Answer: Clear the victim and deliver the shock.

Choking Management

For Conscious Adults:

- Encourage coughing if the victim can breathe.
- Perform abdominal thrusts (Heimlich maneuver) if unable to breathe or cough effectively.
- Call emergency services if the obstruction persists.

For Unresponsive Victims:

- Begin CPR with chest compressions.
- Check the mouth for object before ventilations.
- Use finger sweep cautiously if you can see the object.

Sample Test Questions:

- What is the first step if an alert, responsive choking victim cannot breathe?

Answer: Encourage coughing; if ineffective, perform abdominal thrusts.

- What should you do if the victim becomes unresponsive during choking?
