Problem:

A company delivers goods worth \$50,000 to a customer on December 15, with payment due in 30 days. The company uses the accrual basis and needs to recognize revenue appropriately at year-end, December 31.

Solution Approach:

- Determine if the revenue can be recognized at December 15 or needs deferral.
- Assess if the risks and rewards have transferred.
- Recognize revenue in the correct period, considering the company's revenue recognition policy.

Step-by-step Solution:

- Identify the performance obligation: Delivery of goods establishes the obligation.
- Evaluate transfer of control: Since delivery occurred before year-end, revenue can be recognized if other criteria are met.
- Assess collectability: Payment is due in 30 days, and there's no indication of collection issues.
- Apply revenue recognition principle: Recognize \$50,000 as revenue on December 15 if all criteria are satisfied.
- Adjustments for partial periods: If any service or condition applies, adjust accordingly.
