The Genesis of the Movement

The term "Forks Over Knives" originates from the 2011 documentary that champions a whole-food, plant-based diet (WFPB) as a means to prevent and reverse chronic diseases such as heart disease, type 2 diabetes, and certain cancers. The film draws upon the work of medical professionals including Dr. Caldwell Esselstyn and Dr. T. Colin Campbell, whose research suggests that diets rich in plant foods and devoid of animal products can significantly improve health outcomes.

Core Philosophy

At its essence, the "Forks Over Knives" philosophy advocates for:

- Eliminating or drastically reducing processed foods, animal products, and refined sugars.
- Emphasizing whole, minimally processed plant foods such as vegetables, fruits, legumes, grains, nuts, and seeds.

The core message is that dietary choices profoundly influence health, and shifting towards a plant-based diet is both a personal and planetary imperative.

Scientific Foundations and Evidence
