Q1: What are the main causes of desertification, and how can it be prevented?

Answer:

Desertification is primarily caused by a combination of natural and human factors. Climate change exacerbates arid conditions through increased temperatures and irregular rainfall. Prevention strategies include implementing sustainable land management practices, afforestation, controlled grazing, efficient water use, and adopting conservation agriculture. International efforts like the UN Convention to Combat Desertification (UNCCD) promote awareness and coordinated action.

Q2: Explain how urbanization influences environmental quality.
