Civics and Economics EOC Review Goal 1: Foundations of Government and Economic Systems

Understanding the fundamental concepts of civics and economics is essential for success on the End of Course (EOC) exam. Goal 1 focuses on the foundational principles that underpin government structures and economic systems, emphasizing the development of a well-rounded comprehension of how societies organize themselves to meet collective needs. This review offers an in-depth exploration of these core ideas, organized to facilitate thorough understanding and retention.

Introduction to Civics and Economics

Civics and economics are interconnected disciplines that examine how individuals, governments, and societies interact within political and economic frameworks. Civics deals with the rights and responsibilities of citizens, the functions of government, and the principles underpinning democracy and other political systems. Economics analyzes how resources are allocated, how markets operate, and the impact of economic policies on society.

Understanding these disciplines enables citizens to participate actively in democratic processes, make informed economic decisions, and comprehend the policies and institutions that shape daily life.

Foundations of Government

The study of government foundations involves exploring the origins, purposes, and structures that define political authority and governance.

1. The Purpose of Government

Governments exist to:

- Maintain order and stability
- Protect individual rights and property
- Provide public goods and services (e.g., education, infrastructure)
- Promote economic stability and growth
- Ensure justice and uphold the rule of law

2. Origins of Government Theories

Various philosophies have influenced government development:

- Natural Law and Natural Rights: The idea that certain rights are inherent and universal, as articulated by philosophers like John Locke.
- Social Contract: The belief that governments derive legitimacy from the consent of the governed, emphasizing mutual agreement for societal organization.
- Divine Right: The notion that monarchs derive authority from God (more prevalent in historical monarchies).
- Consent of the Governed: Foundations of democratic principles, asserting government legitimacy depends on the consent of its citizens.

3. Types of Government

Different political systems serve diverse societal needs:

- Democracy: Power resides with the people. Examples include direct democracy and representative democracy.
- Republic: A form of democracy where citizens elect representatives to make decisions.
- Monarchy: Rule by a king, queen, or emperor, often hereditary.
- Oligarchy: Power concentrated in a small elite group.
- Authoritarian and Totalitarian Regimes: Governments with centralized control, limited individual

freedoms, and often political repression.

4. Principles of Democracy

- Popular Sovereignty: Power resides with the people.
- Limited Government: Restrictions are placed on government to protect individual rights.
- Separation of Powers: Dividing government into branches (executive, legislative, judicial) to prevent abuse of power.
- Checks and Balances: Each branch can monitor and limit the functions of the others.
- Federalism: Division of power between national and state governments.
- Rule of Law: Laws apply equally to all citizens, including leaders.

The Structure of Government in the United States

The US government exemplifies a federal republic with a system rooted in democratic principles.

1. The Constitution

- Powers include passing laws, approving budgets, and declaring war.
- Executive Branch: Headed by the President.
- Responsible for enforcing laws.
- Includes the Vice President, Cabinet, and federal agencies.
- Judicial Branch: Interprets laws.
- Comprised of the Supreme Court and lower federal courts.
- Has the power of judicial review to assess constitutionality.

3. Federalism

- Divides authority between federal and state governments.

- Ensures multiple levels of governance and local representation.
- Powers are listed (enumerated), reserved, or implied.

4. Checks and Balances in Action

- Presidential vetoes can be overridden by Congress.
- The Supreme Court can declare laws unconstitutional.
- Congress confirms presidential appointments.

Economic Systems and Principles

Economics examines how societies allocate scarce resources among competing uses. Different economic systems reflect varying degrees of government intervention.

1. Types of Economic Systems

- Traditional Economy: Based on customs, traditions, and barter. Common in rural or indigenous communities.
- Command Economy: The government makes all economic decisions. Examples include historical Communist states.
- Market Economy: Decisions are driven by supply and demand with minimal government intervention. Capitalist economies exemplify this.
- Mixed Economy: Combines features of market and command systems, allowing private enterprise alongside government regulation.

2. Fundamental Economic Concepts

- Scarcity: Limited resources versus unlimited wants.
- Supply and Demand: The core of market economics; prices are determined by the availability of goods and consumer desire.
- Opportunity Cost: The value of the next best alternative forgone when making a decision.
- Incentives: Rewards or penalties that influence behavior.
- Economic Goals: Growth, efficiency, equity, stability, and freedom.

3. Role of Government in Economics
