Loans to shareholders can trigger tax charges such as benefit-in-kind or additional tax on loans if they are not repaid, and careful planning is needed to avoid unintended tax liabilities. What are the key differences in tax treatment between sole traders and limited companies as discussed in P6 2013 regarding Emil Woolf's situation? Sole traders pay income tax on profits, with fewer relief options, whereas limited companies pay corporation tax, and profits can be extracted via dividends or salaries, offering different planning opportunities and tax efficiencies. How should Emil Woolf approach international tax considerations if his 2013 scenario involves cross-border transactions?
