Question What are some simple QBasic programs suitable for class 8 students? Basic programs such as 'Hello World', simple calculator, and number guessing game are suitable for class 8 students to learn fundamental programming concepts in QBasic. How can I write a program in QBasic to find the largest of three numbers? You can write a program that takes three inputs from the user and uses IF statements to compare them, displaying the largest number. For example: Input three numbers, then use IF conditions to determine and display the maximum. What is an example of a QBasic program to calculate the factorial of a number? Here's a simple example: use a FOR loop to multiply numbers from 1 to n, where n is the input number, to compute the factorial and display the result. Can you provide a sample QBasic program for a number guessing game? Yes. The program randomly selects a number, then prompts the user to guess, providing hints whether the guess is too high or too low until the correct number is guessed. How do I create a program in QBasic to display the multiplication table of a number? Use a FOR loop from 1 to 10, multiply the number by the loop counter, and display each result to generate the multiplication table. What is an example of a QBasic program to check if a number is even or odd?
