Sample IELTS Writing Tasks and Band 7 Responses

Sample Task 1: Academic Module

Task: The graph below shows the percentage of households in a country owning different electronic devices from 2000 to 2020. Summarize the main trends and make comparisons where relevant.

Note: A sample Band 7 response would accurately describe key trends, compare data points, and use appropriate vocabulary and linking devices.

Sample Answer:

The graph illustrates the proportion of households owning various electronic devices such as televisions, computers, and smartphones in a specific country over a twenty-year period from 2000 to 2020.

Overall, there was a significant increase in smartphone ownership, which surpassed other devices by 2020. In contrast, the percentage of households owning traditional devices like televisions remained relatively stable, with a slight decline in recent years.

In 2000, television ownership was quite high, at approximately 85%, and this figure experienced only a marginal decrease to around 80% by 2020. Meanwhile, computer ownership saw a steady rise from about 30% in 2000 to nearly 70% in 2010, before plateauing slightly. Most notably, smartphone ownership was minimal at the start of the period but surged dramatically after 2010, reaching nearly 90% in 2020.

The data suggest a shift towards mobile technology, reflecting changing consumer preferences and technological advancements. While traditional devices like televisions remain popular, the rapid adoption of smartphones indicates their central role in modern households.

Sample Task 2: General Training Module

Task: Some people believe that the best way to improve health is to exercise regularly, while others think healthy eating is more important. Discuss both views and give your opinion.

Note: A Band 7 response would fairly present both perspectives, give balanced arguments, and clearly state the writer's opinion.

Sample Answer:

There is ongoing debate about whether regular exercise or healthy eating has a greater impact on

maintaining good health. While both aspects are crucial, opinions differ on which is more effective.

On one hand, proponents of regular physical activity argue that exercise helps improve cardiovascular health, strengthen muscles, and boost mental well-being. Engaging in activities such as jogging, swimming, or cycling can prevent chronic diseases like obesity and diabetes. For example, many health experts recommend at least 150 minutes of moderate exercise weekly as a way to stay fit. Furthermore, exercise can help manage stress and improve sleep quality, contributing to overall health.

Conversely, others emphasize the importance of healthy eating. A balanced diet rich in fruits, vegetables, whole grains, and lean proteins supplies essential nutrients necessary for bodily functions. Proper nutrition can prevent deficiencies, reduce the risk of illnesses, and support a healthy weight. For instance, reducing intake of processed foods and sugary drinks is often linked to lower rates of obesity and related health problems.

In my opinion, both exercise and healthy eating are vital and should be combined for optimal health. Neglecting either aspect can undermine overall well-being. For example, exercising without proper nutrition may not yield the desired health benefits, while healthy eating alone might not be sufficient to maintain physical fitness. Therefore, a balanced approach that includes regular activity and a nutritious diet is most effective.

Dissecting a Band 7 IELTS Writing Sample

Let's analyze an example IELTS Task 2 essay that would likely score around band 7, followed by a breakdown of its strengths and areas for improvement.

Sample Prompt:

Some people believe that the government should invest more money in public transportation systems, while others think that funding should be directed towards road construction and maintenance. Discuss both views and give your own opinion.

Sample Band 7 Essay:

In recent years, the debate over government spending priorities has become increasingly heated. While some argue that investing in public transportation can benefit society by reducing traffic congestion and pollution, others believe that maintaining and developing roads should take precedence to support economic growth. This essay will examine both perspectives before offering a personal opinion.

Supporters of public transportation emphasize its environmental advantages and its potential to alleviate urban congestion. Efficient bus and train networks can encourage people to opt for mass transit rather than personal vehicles, leading to lower emissions and better air quality. Furthermore, improved public transport can make cities more accessible, especially for those who cannot afford private cars. Conversely, advocates for road development argue that roads are vital for freight and personal travel, vital components of a thriving economy. They contend that well-maintained roads facilitate smooth logistics and connectivity, which are essential for businesses and commuters.

In my view, although roads are critical, investing in public transport offers longer-term benefits. Sustainable transportation solutions can address environmental challenges and improve urban living standards. Therefore, I believe the government should allocate more resources toward developing efficient, eco-friendly public transit systems while maintaining existing roads.

In conclusion, both approaches have their merits, but prioritizing public transportation aligns better with future urban development goals.
