Deep Dive into Notable Past Questions from the 2009 May Sitting

To understand the exam's expectations, it's crucial to analyze specific questions that appeared in the 2009 May paper.

Question 1: Investment Appraisal Using NPV and IRR

This question often requires candidates to evaluate a proposed investment project with given cash

flows and a required rate of return. Typical steps include:

- Calculating the NPV considering the discount rate.
- Finding the IRR by trial or interpolation.
- Comparing these results with the company's hurdle rate.
- Making a recommendation based on the analysis.

Key points for candidates:

- Be proficient in discounting cash flows.
- Understand the differences and limitations of NPV and IRR.
- Be able to interpret the results in a strategic context.

Question 2: Cost of Capital Calculation

Candidates might be asked to compute the WACC for a firm with given data on debt, equity, and market values. This involves:

- Calculating individual component costs.
- Weighting each component based on market values.
- Incorporating tax considerations where relevant.

Important tips:

- Remember to adjust the cost of debt for tax shields.
- Use current market data for accuracy if provided.
