- According to the Kerala State Planning Board, the IMR in Kerala was around 7 per 1,000 live births in recent years.
- Disparities exist between urban and rural regions, with some tribal and remote areas experiencing higher mortality rates.
- Common causes include neonatal complications, infections, malnutrition, and birth-related issues.

Factors Contributing to Child Mortality

Several factors influence child mortality rates, including:

- Inadequate access to quality healthcare in rural and tribal regions
- Malnutrition and food insecurity among vulnerable populations
- Environmental hazards like water pollution and sanitation issues
- Delayed or insufficient medical intervention during emergencies
- Awareness gaps regarding child health and preventive care

Addressing these issues requires a multifaceted approach involving government policy, community participation, and awareness campaigns.

Kerala is often celebrated for its health infrastructure, which includes:

- Widespread primary health centers (PHCs)
- A network of community health workers and ASHAs
