Sample Answer:

Rural-urban migration occurs when people move from countryside areas to cities, often driven by the search for better employment opportunities, education, and healthcare. For example, in India, many rural residents migrate to cities like Mumbai and Delhi due to poverty and lack of services. The effects include rapid urban growth, increased pressure on infrastructure, and the development of informal settlements. Conversely, it can lead to economic growth in urban centers but also challenges such as overcrowding and environmental degradation.

Urban Growth and Challenges

Sample Question: Assess the impacts of urbanization on environmental sustainability.

Sample Answer:

Urbanization can significantly impact environmental sustainability by increasing pollution, reducing green spaces, and consuming large amounts of resources. Cities like Beijing have experienced air quality issues due to industrial emissions and vehicle use. While urban areas can promote sustainable practices through green technologies and public transport, unchecked growth often leads to environmental degradation, loss of biodiversity, and increased carbon emissions.
