Maintenance & Replacement Tips:

- Ensure it is free of cracks and blockages.
- Replace if it becomes damaged or warped.

6. Diffuser (Distributor)

Description:

A component attached to the standpipe, the diffuser spreads incoming water evenly across the sand bed during backwashing.

Function:

It prevents channeling and ensures thorough cleaning of the sand media.

Maintenance & Replacement Tips:

- Check for cracks or clogs.
- Replace if malfunctioning to maintain effective backwashing.

7. Pressure Gauge

Description:

Mounted on the top of the multiport valve, the pressure gauge indicates the pressure inside the filter tank.

Function:

Monitoring pressure helps determine when backwashing is necessary; a rise of about 8-10 psi above the clean, starting pressure indicates it's time to backwash.

Maintenance & Replacement Tips:

- Calibrate or replace if the gauge becomes inaccurate.
- Regularly monitor to prevent pressure build-up and potential damage.

8. Drain Plug
